INNOVATIVE SOLUTIONS

A cardboard shredder or perforator is a sustainable solution to repurpose and recycle corrugated cardboard waste into packaging or void-fill material. These machines pay for themselves and help to reduce the cost of packaging materials and waste hauling.

Our Goal is to give to you the opportunity to recycle the cartons, to re-use your cardboards and to convert them into High quality packing materials. Make your business eco-friendly and follow the "circular economy", the best way to save our Health, Energy and... Money!

INNOVATIVE SOLUTIONS

Cardboard shredders are the ideal solutions for all dispatching and warehouse areas. They instantly convert the bulky used cardboard packaging of goods delivered to you into versatile and, most importantly, free packaging material.

A paper fiber can be reused about seven times before it becomes unusable for paper and board making.

Reasons for volume reduction:

- Reducing costs of transportation
- Optimum compression of material for feeding to existing pressed-waste containers or baling presses

The SHREDDER transforms used or unusable cardboard into practical and effective packaging material without wasting time or money

Mainly two type of cutting version is available for management of cardboard.

STRIP VERSION

The STRIP version shreds your cardboard waste into (long) strips, the best way for special packaging applications, like for medical products also ideal, to replace the straw for Animal Bedding. For this purpose we should use cardboard Shredder

NET VERSION

The cardboard elastic net (NET versions) generated by the machine, easily adapts to any type of packaging, providing remarkable impact resistance. The NET version convert the cardboards in a shock absorbing and flexible netting the best solution to replace plastic packing peanuts, bubble wrap and packaging air bags. For this purpose we should use cardboard Perforator

Our Goal is to give to you the opportunity to recycle the cartons, to re-use your cardboards and to convert them into High quality packing materials. Make your business eco-friendly and follow the "circular economy", the best way to save our Health, Energy and... Money!

WHY BUY FROM NXGEN?

NxGen provide powerful shredder/ perforators for several layers of used cardboard into packaging material.

Technology, design, high quality parts and smooth operation

- ❖ Powerful single/three-phase motor allows for required operation
- ❖ Easy to operate via rotary switch for On/Off and return. Tempered and resistant gears for heavy-duty work.
- ❖ Bearings with high radial loads.
- ❖ Cutting and perforation are a single process, so no time is wasted in trimming the cardboard
- ❖ The hardened cutting rollers are made from a single piece of metal and are therefore completely resistant to damage from paper clips and other soft metal items
- ❖ Cutting blade made of hardened HCHC material
